

## Technical equipment, Bio Rex foyers

Would you like to add visibility to your event and provide your guest with a high standard technological experience, with skilled technicians running the event smoothly?

Events in Bio Rex don't necessarily require an event agency. In addition to the basic technological equipment that comes with the space you have the opportunity to order a more advanced technological implementation through Rex Events.

**Behind the link** are some package examples. Depending on the nature and need of each event it is possible to tailor a unique technical implementation. We can for example provide you with a message wall, a DJ sound system or a band PA- system according to the requirements of the ensemble.

Each additional feature in any package can be rented separately.
